

SERVICE MANUAL

DAIHATSU

TYPE A4L

Series
Automatic Transmission

FOREWORD

This manual is a service manual for type A4L Series, automatic transmission.

Based on the hitherto-employed A4LB type transmission, the A4L Series automatic transmission has incorporated some changes in specifications, such as the change in planetary gear ratio, the sheet metal-made 1st & reverse piston and the employment of a three-stage characteristic governor.

This manual describes only sections where Type A4L differs from Type A4LB. Therefore, for those items not posted in this manual, please refer to the A4LB Service Manual (No. 9723).

All information used in this manual was in effect at the time when printed.

However, the specifications and procedures may be revised owing to continuing improvements in the design without advance notice and without incurring any obligation to us.
